Institutional Access to the MDPI Susy (Submission System)

Institutional Membership Page: Access to Articles in Processing and Articles Published

Institutions receive free access to the MDPI's Submission System "Susy" as part of the institutional membership program, where information on papers submitted and published from associated authors can be viewed. This allows for central control over the papers that have been submitted to our journals, including information on authors, co-authors, submission date, title, current status, article processing information, and more. The first version or (if available) the accepted version of each paper submitted by an author associated with the institution can be viewed. The platform allows for all relevant data to be exported as an Excel readable *.xls file. Also, information on articles published since 2010 can be accessed (for articles from 1996 – 2010, the search function via www.mdpi.com can be used).

The aim is to provide libraries and central offices additional control and transparency over papers submitted to our journals, and provide early notification of potential costs involved with the submissions. The system also allows for an e-mail alert for whenever a new paper is submitted to an MDPI journal.

To gain access to the institutional membership page in the MDPI Susy environment, members are able to navigate to <https://susy.mdpi.com> and enter the e-mail address for your institute and password.

- Edit Profile
- Logout

Institutional Member View

- Overview of Articles
- Manage Your Automated E-Mail Alerts

Welcome to your MDPI profile.

Please note:

1. All data is for articles as of 2010 (for articles published between 1996 – 2010, please navigate to www.mdpi.com and enter the e-mail domain of your institution in the “Author” search field in the header of the page).
2. Articles published prior to establishment of the membership, will be displayed if the author used the e-mail address of the institute (we have filtered articles out that are associated with the domain of the university). For newer articles, we are able to display all those that either have an e-mail domain identifier, or where the membership was selected during submission.
3. The APC information in the downloadable report shows the journal APC information and the actual invoiced amount. The actual invoiced amount is only available in the system since August 2014; hence the data is only complete going forward. It is important to note that the actual invoiced amount is mostly lower than the journal APC due to discounts or waivers.

The MS Excel report can be accessed by clicking on “Export Report”. Based on further feedback from members, this export may evolve further and contain additional information in future, as required.

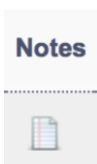

Papers published (Data as of 2010)

Institute **Discount**

Please determine if you are eligible for a reduction in the article processing charges through an institutional membership. **See if your institute has established a membership with MDPI and confirm:**

Select Institute

- RWTH Aachen University (10%)
- Technical University of Munich (TU München) (10%)
- Technische Universität Braunschweig (TU Braunschweig) (10%)
- Technische Universität Chemnitz (10%)
- University of Bayreuth (10%)
- University of Göttingen (Georg-August-Universität Göttingen) (10%)
- University of Hamburg (10%)
- University of Kassel (10%)
- University of Osnabrück (10%)
- University of Potsdam (10%)

MDPI to your library here.

If the IP address of the institution has been provided, then the membership is automatically preselected in case the author submits from within the university network.

Select Institute

cam

UK

University of Cambridge (10%)

For institutions with specific eligibility criteria, these are then displayed to the author.

Please note the eligibility criteria for the University of Cambridge's central open access funds.

Gold funds are available for:

- Papers acknowledging funding from Arthritis Research UK, Breast Cancer Campaign, British Heart Foundation, Cancer Research UK, Leukaemia & Lymphoma Research and the Wellcome Trust, where the corresponding author is at the University of Cambridge
- Papers acknowledging RCUK funding (AHRC, BBSRC, EPSRC, ESRC, MRC, NERC or STFC), where the corresponding author is at the University of Cambridge

All Cambridge authors will receive the membership discount. But please note that there are no central funds available for authors who are not eligible under the above-mentioned criteria. Non-funded authors will be requested to pay for Article Processing Charges from their own budgets.

For further information, please visit: www.openaccess.cam.ac.uk or email info@openaccess.cam.ac.uk

- I am eligible for central funding under the above mentioned eligibility criteria
- I am not eligible for central funding under the above mentioned eligibility criteria
